

The PROAIR Group

The evolution of PROAIR since it was established in 1996 is immeasurable... One of the world's fastest growing aviation companies, with roots firmly integrated in both the European and Global Aviation Markets, PROAIR is not only seen as a market leader but as a pioneer in the future of private aviation.

From the days of simply offering an aircraft brokerage service, PROAIR have developed to specialise in Aircraft Charter, Aircraft Management and Aircraft Sales. These 3 key areas of aviation make PROAIR one of the few companies with the ability to fulfil every aspect of a client's specific requirements.

AIRCRAFT CHARTER, MANAGEMENT & SALES

Where it is usual for many companies to succeed in one area of expertise, the flexibility of PROAIR offering all aviation services under one umbrella differentiates them from any competitors. A natural progression and synergy exists between an aircraft purchase, the necessity for it to be managed, and then made available for charter when not in use by the owner. This chain of progression is often broken by the involvement of several companies undertaking different roles. For all aspects to be overlooked and undertaken by one company ensures a cost-effective and seamless transition.

Lets Take Off Together...

Aircraft Charter

From Where You Are... To Wherever You Want To Be

Maximise your time for business or for pleasure, by flying to your destination on your own Private Aircraft...

Arrive at the airport 20 minutes before you are expected to depart, eat the finest food, and drink the best champagne whilst flying on one of the worlds most luxurious aircraft. No long queues at check-in, arrive closer to your final destination and even have the ability to change plans during the flight.

With PROAIR's dedicated 24 hour Charter Team you have a specialist in private aviation wherever you are in the world.

Our fleet of highly exclusive aircraft can be available for your flight with less than 24 hours notice. **Guaranteed!**

The PROAIR fleet are amongst the world's finest aircraft, and when combining this with the personal tailoring of your individual charter, we can ensure your flight will go precisely as scheduled.

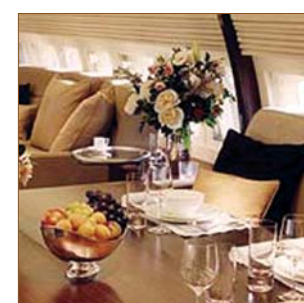

Aircraft Management

Let Us Take the Responsibility

If you own an aircraft or expect to, then it is likely at some point you will require Aircraft Management. PROAIR specifically employ a specialist team to take care of every aspect. From crew employment and training, to continual maintenance checks, it is our responsibility to ensure your aircraft remains legal, and stays flying. PROAIR can offer a multitude of management packages based around your existing aircraft, or a future purchase.

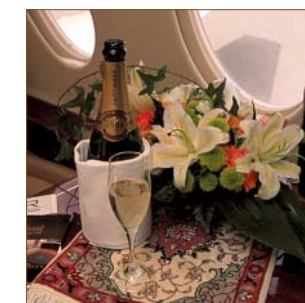

Regardless of your intentions, be it for private use or commercial gain, we can tailor a management proposal around you and your travel requirements. Ultimately we take care of your aircraft so your only task is to contact us with your own schedule. If your wish is to minimise the costs associated with aircraft ownership, then we can make your aircraft available for charter on the dates you don't use it.

Aircraft Sales

The Aircraft for You

Choosing an aircraft, manufacturer, or supplier can be a lengthy and expensive task. There are literally millions of options available on the market and selecting the correct one for you is only a small part of the process. Our Sales Team have access to every aircraft that is available for purchase on the global market and will assist you each step of the way.

You specify the requirements and we do the rest . . . a 4 seat aircraft, a large stand-up cabin, or a maximum budget of \$3,000,000 USD. Regardless of the intricacies, it is our job to work the aircraft around your requirements, and not the other way around.

Once the most suitable option has been identified, PROAIR will search for the best example of that type on the market.
